## PROFESSIONAL SUMMARY

Hey! I'm a full-stack developer and Computer Science student at Addis Ababa University (2025–2030) who loves building impactful projects. I work on both web and mobile applications, moving easily between frontend and backend—crafting clean UIs, reliable backends, and smooth user experiences. Recently, I've been exploring DevOps and AI agents, consistently experimenting with new tools, building projects, and sharing what I learn. If there's an idea worth building, I'm all in.

---

## TECHNICAL SKILLS

**Programming Languages:** JavaScript | TypeScript | Python | Go | C++

**Frontend Development:** HTML5 | CSS3 | React.js | Next.js | Tailwind CSS | ShadCN UI | Redux | Zustand | Tanstack Query | Framer Motion | Vite | React router

**Backend Development:** Node.js | Express.js | Django

**Database & ORM:** MongoDB | Mongoose

**Mobile Development:** React Native | Expo

## PROJECTS

**QuickBlog** – AI-Powered MERN Blog Platform

A full-stack blogging platform built with the MERN stack, integrating Google Gemini for AI-assisted writing and ImageKit for image optimization. It includes a clean UI, an admin dashboard, and full CRUD functionality.
**Tech Stack:**
- Frontend: React, Tailwind CSS
- Backend: Node.js, Express
- Database: MongoDB
- APIs: Google Gemini API, ImageKit API

**Live**: https://quick-blog-natnael.vercel.app/
**GitHub**: https://github.com/natitam1/QuickBlog-Natnael

**Bookworm –** Cross-Platform Full-Stack Book App

A cross-platform full-stack book application that runs on web, Android, and iOS using a single codebase — built entirely with free and open-source tools. Users can authenticate, add books, manage their collection, and browse an infinite scrolling feed with multiple themes.
**Tech Stack:**
- Frontend: React Native, Expo
- Backend: Node.js, Express
- Database: MongoDB
- Auth & Media: JWT, Cloudinary
